Credit approval checklist

A practical checklist for preparing a complete approval record and a clear operational handover.

Prepare the approval record

Bring the request, supporting information and current document references into one record before handing it to the reviewer.

1. Confirm the borrower and facility identifiers against the source record.
2. Record the purpose of the request and the owner of each outstanding item.
   - Check the supporting evidence.
   - Confirm the receiving team.

Confirm the review evidence

Control	Required evidence	Owner
Identity	Borrower and facility references	Author
Approval	Recorded decision and approval date	Manager
Handover	Receiving-team acknowledgement	Operations

Use **clear descriptions**, *current evidence*, and traceable references. Open the source checklist.

> *Review the complete record before proceeding.*

Record the handover

Keep a clear record of what has been checked, what is outstanding and which team receives the next action.
